

ShortKeys

Text Replacement Software

Overview

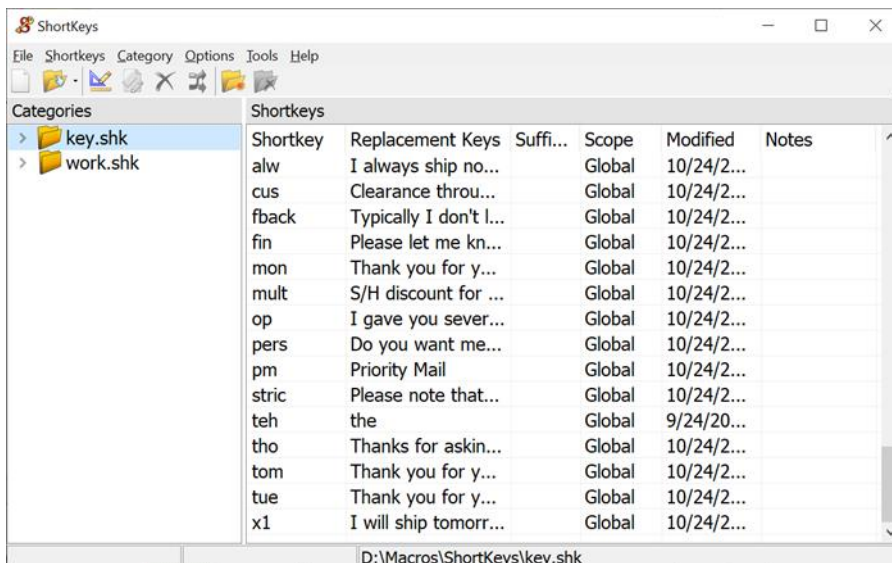

ShortKeys is a text replacement utility to insert blocks of text into other applications by simply typing a few user defined keystrokes. Just type your shortcut text combination and it is substituted with the replacement text you defined.

How it works

1. Select a few characters for the shortcut activation.
2. Insert the text to play back – a word, phrase, paragraph or pages of text.
3. Save the change.

Type the shortcut abbreviation in your application and watch it quickly and reliably insert the expanded text.

It's so quick and easy, you'll wonder how you ever survived without it.

Running a shortcut macro

Choose from one of the two methods below to activate a shortcut macro:

1. Prefix Key

Type one, two or no characters before the shortcut to activate.

2. Suffix Key

Type the shortcut and press the Space Bar or Enter to activate.

Why Use ShortKeys?

1. Speed
2. Accuracy
3. Reduce boredom from typing
4. Less stress on hands and wrists
5. Productivity

How Customers Use ShortKeys

(in their own words)

Teachers

"I'm a teacher and I type the same thing 100 times a day. You are saving hours of my life."

Boilerplate text

"We use it through our entire organization to send canned, personal responses to emails and ensure everyone uses consistent messaging and language. It can easily save 2 - 3 hours per day per worker."

Disabilities

"I am a one handed individual and I LOVE ShortKeys, saves me so much time you have no idea!! Brilliant product!!!!"

Internet

"If you ... sell on the Internet, or on eBay, or just regularly type the same phrases; ShortKeys can save you so much time."

Transcriptionists

"I hope you're selling this to the transcribing industry. We're the people who use it most -- court, legal and medical transcriptionists. This program is amazing."

Help desks

"I work in a helpdesk. I primarily use it for repetitive typing in our ticketing system. Saves time and gets me onto the next call quickly."

Repetitive typing

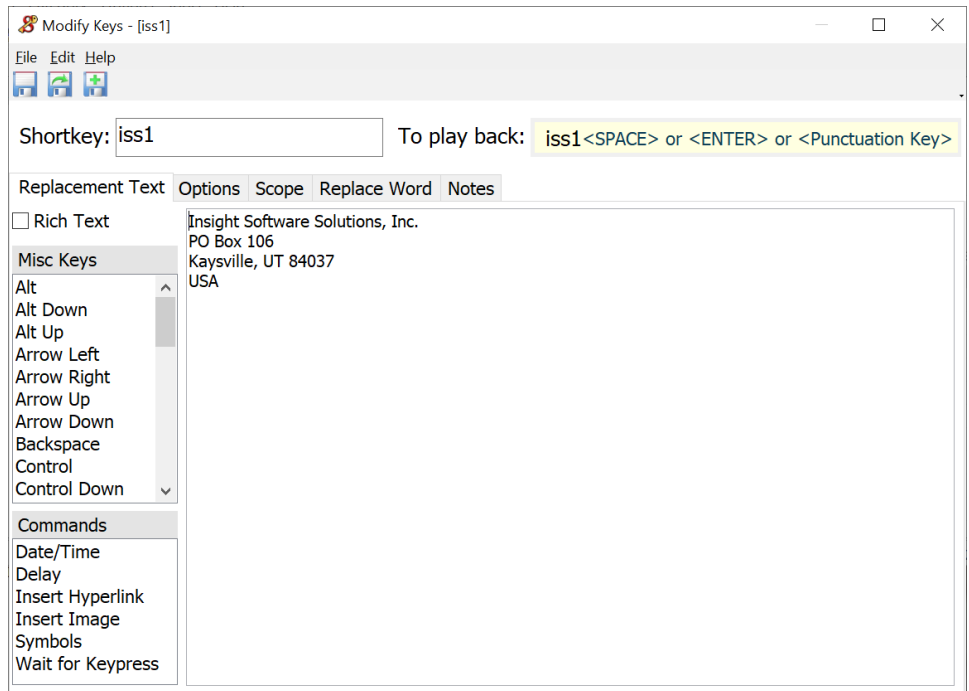

"I do a lot of repetitive typing and this tool has cut my workload by 75%."

I cannot thank you enough for the hours this saves me every week. I am an online teacher and I grade many things over and over again. While many things are personalized, much of it is repetitive and having shortcuts has saved my sanity many days (especially at the busy term's end!).

--Lindsay S

"I cannot begin to count the number of times a week I bless whoever invented ShortKeys. This is an absolutely fabulous time-saver ... and frustration-soother ... and hands-down the best money I've spent on anything related to my computer in the past five years."

--Rebecca B.

PROGRAM FEATURES

- Create an unlimited number of files.
- Load more than one macro file at a time.
- Create virtually an unlimited number of shortcuts per file.
- Password protect macro files.
- Include up to 65,536 characters of text per shortcut.
- Network option with file locking capability.
- Sort shortcuts into categories.
- Import and export shortcuts.
- Automatic file backup and program update options.
- Customize the look and feel of the program.
- Add notes to any shortcut for later clarification.
- Supports ultra-high definition / 4K monitors.

SUFFIX KEY OPTIONS

- Allow additional punctuation keys to initiate the shortcut.
- Retype the suffix key after the text has been inserted.
- Invoke a "hint mode" window.
- Create suffix/gerund endings such as -ing, -ed, -ment, etc. for replacement text words.

OTHER PLAYBACK OPTIONS

- Play back text in a rich text format - fonts, colors, etc.
- Send the text through the keyboard or the clipboard.
- Insert embedded hyperlinks.
- Set replay speed when sending keystrokes via the keyboard.
- Pause playback to allow manual entry.
- Insert images.
- Insert embedded email address links.
- Add timed delays to the text playback.
- Require that the shortcut input be case sensitive
- Allow macros to run in all programs or a specific window.

SEND CHARACTERS AND KEYSTROKES

- Add symbols or international characters.
- Insert current, past or future dates in text replacements.
- Play back the TAB, Enter, Alt, Ctrl, F1 - F12, Backspace keys, plus many others.
- Insert the current or adjusted time into text replacements.

System Requirements

System Requirements

- Pentium or equivalent processor or greater
